

ASBESTOS / FLOODS | FIRES | NATURAL DISASTERS

ASBESTOS REMEDIATION & MAKESAFE EXPERTS

Zero ASBESTOS work closely with many disaster recovery experts, insurance builders, trade, and industry affiliates when it comes to operating in emergency situations that involve (often) damaged asbestos. Events including floods, fires, cyclones, etc all create high risk exposure threats in regards to damaged asbestos being present especially to rescue and clean-up works crews.

With more than one out of every three homes built prior to 1990 in Australia containing some form of asbestos it is an important to remember that there is no known safe level of exposure to asbestos fibres. The discovery of asbestos in a damaged state during or immediately following a flood, fire or other natural disaster is very common and is cause for much concern.

Asbestos materials can become easily compromised in an emergency situation or natural disaster with burning, cracking, collapsing and breaking being very common ways that ACM (Asbestos Containing Material) responds to extreme circumstances. Once burnt, cracked, collapsed or broken the damaged asbestos must be controlled, contained and remediated by professional asbestos abatement and remediation experts as soon as possible. Air monitoring in these situations is usually mandatory and something Zero ASBESTOS consider good practice.

Zero ASBESTOS have a dedicated team of asbestos technicians who are all trained and experienced in makesafe and disaster works on a large scale. Zero have had workers involved in various makesafe works throughout many years including the Mackay floods, Brisbane floods, Bundaberg floods, and most recently the 2013 Sunshine Coast hail storm. With one Queenslander dying every six days (and rising!) from asbestos related disease it really isn't worth the risk, call in the experts!

- 24HRS MAKESAFE WORKS
- AIR MONITORING
- ENCAPSULATION (Foamshield, etc)
- SITE CONTAINMENT
- PUBLIC NOTIFICATIONS

MASTER BUILDERS Member No. 26828
 A-CLASS ASBESTOS Licence No. 2302365
 QBCC Licence (Formerly BSA) No. 1186280

Zero ASBESTOS proudly boasts:
